

The Union Of Souls

3 Colours Red

Wake up from your daydream
Come out whoever you are
We made it through the winterkill alone
Face to face with upset
Adversity my friend
Took the strain and turned the pain to
Love we send

On and on into the unknown
In the union of souls

Chemical vows together
Through streets and roads we grow
Ascending heights in city lights of neon glow
Singing songs of sorrow
The union so strong
Trying to find a place where we belong

In the union of souls

You'll find doubt to the left
And pain to your right
They'll be serving broken promises
On pay per view tonight

This is the union of souls
