## **Sudden Change**

It's odd that you would think What's always been a game to me would suddenly change Feeding off the empty I waste another day To find a way through somehow Somehow You'll find a way through me

There's no more to say tonight Think till your head turns hollow N' I fear the more that I try The further I get No way to tell you why

It's nothing new too me The ground beneath me always seems to just give way Bleeding right in front of me What more could I say It's find a way through somehow Somehow You'll find a way through me

Keep holding on or let it go Your weakness hides but still it shows Keep holding on or let it go
