## Deceased

I'm not here to harm you So let me disarm you, you'll see what I mean I'm yours for you already know me Stay with me and show me the way to my dreams

Together we can live a life we know is real We move silently through my room and make me feel That love can be a place we never have to leave Be strong, stay with me, never disappear

Deep in my heart I see clearly We should be revealing our secrets today Please, don't just stay there, I'm waiting For the plans you've been making to take me away

Together we can live a life we know is real We move silently through my room and make me feel That love can be a place we never have to leave Be strong, stay with me, never disappear

Together we can live a life we know is real We move silently through my room and make me feel That love can be a place we never have to leave Be strong, stay with me, never disappear

Together we can live a life we know is real We move silently through my room and make me feel That love can be a place we never have to leave Be strong, stay with me, never disappear
