

Clouds of Glass

A Life Divided

I'm in a hurry,
I got no second to lose
I'm leanin a furry
but wat else could I do?
I've been ready for this moment through all of this time
Over and over again that I brought it tonight

I keep waiting till the dark destroys the light

And when the moon's arrived
Up from the clouds of glass
And when the stars are high
Up from the clouds of glass
Drop me in infinity
The crystal air and deep blue seas
And when the night arrives
Up from the clouds of glass

I feel freedom
through my fears and despair
Seen all my demons
vanishing in thin air
I've been praying for this moment for all of my life
Over and over again that I brought it tonight

I keep waiting till the dark destroys the light

And when the moon's arrived
Up from the clouds of glass
And when the stars are high
Up from the clouds of glass
Drop me in infinity
The crystal air and deep blue seas
And when the night arrives
Up from the clouds of glass

There's no place on earth I'd rather be
Here I'm standing on top of the world,
I'm falling free
Nothing I tink really matters
It's time to fuse up forever

And when the moon's arrived
Up from the clouds of glass
And when the stars are high
Up from the clouds of glass
Drop me in infinity
The crystal air and deep blue seas
And when the night arrives
Up from the clouds of glass
