

# Goodbye

## A Life Divided

We are the poison, we're spreading disease  
We are the ones who just don't think that you can breathe  
We are the devils of the frightening dreams  
We are the uninvited, same and I just believe

Let's go, I'm leaving  
We gotta break apart  
We need to get away and find out when it's time

So say goodbye to this world, you were never welcome  
So say goodbye to the world of the beautiful ones  
So say goodbye  
Say goodbye forever

We are the demons, we're the pain in the ass  
We are the fever and we burn inside their veins  
We are the ruins that you try to forget  
We're the ones who keep spinning the wheel of fear and happiness

Let's go, I'm leaving  
We gotta break apart  
We need to get away and find out when it's time

So say goodbye to this world, you were never welcome  
So say goodbye to the world of the beautiful ones  
So say goodbye  
Say goodbye forever

All this beauty wasn't meant for you and me  
Til the records burn and that's not what you see  
He's never been proud of the family  
So just don't look back when you leave

So say goodbye to this world, you were never welcome  
So say goodbye to the world of the beautiful ones  
So say goodbye  
Say goodbye forever

Say goodbye forever!
