Awaken To Winter

A Whisper in the Noise

Awaken to winter Young child Here it has come Awaken My dear love A new day's begun Suffer the many Their labours undone So calm down, calm down, calm me down calm down Awaken to winter Young child Your labours undone The elders around you No longer need laughter Or shrug So calm down Calm down, calm me down, calm down Distance yourself in presence To ghost of habit Deliverence hosts A severence thwart to pattern Imagine a place made for us Far from it here

So calm down, calm down, calm me down, calm down...

Of far and rust
