

# Come And Save Us

Aaron Shust

The edge of a cliff  
The dead-end signs  
That we've been ignoring all this time  
All our mistakes and crossing lines  
That sinking feeling that's not far behind  
We're less than more, we're falling short  
No matter how we try...

There's nothing we can do  
Nothing we can do  
Father we need You  
To come and save us

If we could see  
Behind the veil  
Just a glimpse of how You love us when we fail  
Maybe we would finally see You mercey never ends

There's nothing we can do  
Nothing we can do  
Father we need You  
To come and save us

There's nothing we can do  
Nothing we can do  
Father we need You  
To come and save us

It's all been done  
It's all been done  
You have come  
All for love

There's nothing we can do  
Nothing we can do  
Father we need You  
To come and save us

There's nothing we can do  
Nothing we can do  
Father we need You  
To come and save us

Father we need You  
To come and save us  
Father we need You  
To come and save us

To come and save us
