

Under My Sun

ABBA

I lead my love alone
I don't hide it
Sometimes I am an open steamy fire
That the water can't swell
Now everything is cold
You can't hide it
Now let your body slowly take you higher
Let your dreams be fulfilled

You are the one
You're the true star
Under my sun
Second to none
You're the true star
Under my sun

There is no way I will let this moment
Pass me by
Listen to me now
Set yourself free now

You are the one
You're the new star
Under my sun

I lead my life alone
I don't hide it
Because I am open steamy fire
That the water can't swell
You're in the danger zone
You can't hide it
Now, let your body slowly take you higher
Let your dreams be fulfilled

You are the one...

There is no way I will let this moment...

You are the one
Under my sun
You are the one
Under my sun

You are the one
You're the new star
Under my sun
Second to none
You're the true star
Under my sun

There is no way I will let this moment...

You are the one
You're the one star
Under my sun (let your body take you higher, let your dreams be fulfilled)
You're the one star

Under my sun (let your body take you higher, higher)
