

I Will Stay

Adam Gontier

I have walked through the forest
I have walked alone a long way
But I just kept on going
Picturing your smile so it wouldn't fade away
It won't fade away...

I watched you sin, I felt your beauty
I've seen your rack along the way
But you just kept on going
Holding on so tired so you wouldn't slip away
You won't slip away...

Your era struck my heart
And that is where it will stay
My eyes are stinging as I feel you walking away
What happen to you later?
Does it sound the same way?
If you're lost, if you're lost, I will stay

Oh, we've lived through of life
From all over tears
Oh, they keep coming down
Build up from all these years

Your era struck my heart
That's where it will stay
My eyes are stinging as I see you walking away...

Your era struck my heart
And that is where it will stay
My eyes are stinging as I feel you walking away

What happen to you after?
Does it sound the same way?
If you're lost, if you're lost
If you're lost, if you're lost
I will stay, I will stay
