## Way I'm Made

Adam Gregory

I dreamt last night I was far away Where coyotes howl and cotton woods sway Casting shadows in firelight A cowboy moon burns so bright

I'd like to think John Wayne's out there On his horse the wind in his hair Somewhere riding out there

And I'd like to believe there's someone for me That God made especially And custom made for me

That's just the way I'm made I'm put together Bailing wire and string What not whatever comes my way

That's the way I'm made

And I like to work hard in the sun And do my job 'til the day is done Work just as hard at havin' fun

And I'd like to turn, turn the music up Windows down kick up some dust That's just what I love Just be yourself, be who you are Say what you mean, speak from the heart Mean what you say, finish what you start

Just be yourself, be who you are Just be who you are

And I'd like to think John Wayne's out there On his horse the wind in his hair Somewhere riding out there

And I'd like to believe there's someone for me That God made especially Custom made for me

That's the way I'm made...
