I know you've got things to do (I do too) I just want to spend all my time with you (Feels so good) I'm so hard to impress Don't leave me on this stretch alone When I'm out at a party I'm just excited to get home And dream about you All night long I don't know how you got through to me (I'm so cold) It's all happening so easily (Like oh my God) It's so hard to digest Usually I'm best alone But every time that you text I want to get on the next flight home And dream next to you All night long Maybe it's the way you remind me of (Where I come from) Or how you make me feel beautiful (And then some) The sight of you is dramatic One glimpse and I panic inside I get lost in our hours 'Cause you possess powers I can't fight That's why I dream about you All night long All night long

All night
