

Moments of Evolution

Ador Dorath

Burning sap of the Planet
Breaking through the depth
From the Abyss - Earth is core
Never falls asleep

Rises on the surface
Melting and scorching
Jetting and effusive
Ravages and devastating
Vitalizing, warp, wreck, and metamorphosing

Million years traveling through time
Talking to each other
Saturn The Creator
Venus The Mother of God
Those that had the right of the first night

Oaks and maples
Limes and yews
Beat the retreat and face the south
The Storm and Chill
The Night and Day
The Death and the Dreams

He said...
"There is no end that would not be a start,
Water and the Wind will be our reliance."
She said:
"We have a long way to go,
Shall we go, there is no time to tarry."
Million years traveling through time
Those that had the right of the first night

The Glacier drew a wintry breath
Tundra extends to it's glacis
The ice age is coming it is cold
Here comes the first of those who are going to make a history
