

Constellations

Adore Delano

It's the weekend, anything can happen
Anything can happen tonight
Fill the space with cosmic revelation
Let our bodies go on a flight

And just surrender
Live forever
It's all ours tonight

A million stars light up the night
The constellations give me life
And heaven's boulevard is shining
I'm giving in, and letting go
The constellations fill my soul
Our hearts beats are on zero gravity

This is our world, decorate the dancefloor
Through a new dimension we go
Supernatural, levitate and shout out
Lucy in a sky full of gold

And just surrender
Live forever
Is all ours tonight

A million stars light up the night
The constellations give me life
And heaven's boulevard is shining
I'm giving in, and letting go
The constellations fill my soul
Our hearts beats are on zero gravity

I can fly
I can fly
I can fly
I can fly
I can fly

A million stars light up the night
The constellations give me life
And heaven's boulevard is shining
I'm giving in, and letting go
The constellations fill my soul
Our hearts beats are on zero gravity
