## **Black Path**

## Aereogramme

It's time to follow the black path And come tommorow you won't laugh alone Faced down you can see the ground turn From green and red, black to grey Where everyone becomes afraid of you

To find your journey on the black path The darkest Sunday from your own past Right now, I can see the ground turn From green and red, black to grey Where everyone becomes afraid of you

If you're the one If you're the one

See how blasphemous laugh can be See how blasphemous laugh can be See how blasphemous laugh can be See how blasphemous laugh can be
