

The Internet

Alex Cameron

I started, a new life

On the Internet

On the Internet

But not because, I don't like what I've got
I just, feel like it's time

I've got, everything I need
It's a strong connection, that's high-speed

Got two modems, and a fax machine
I got receptionists, they keep my office clean

I've got, a master plan
I'm my own boss, I'm the man

I got business cards, you can find me

On the Internet

On the Internet

I call the shots, I give the green light

On the Internet

On the Internet

On the web
