

Animals

Alex & Sierra

Hiding away
Turned into prey
Like we're animals
Yeah, we're loving like we're animals

We know it's too late
(I'm bleeding but it feels right)
Hunting the game
(We're flying through the night)
Like we're animals
Yeah we're loving like we're animals

We're not here to break no hearts
Just let it go

'Cause every single touch don't mean a thing
And every time you're calling out my name
We know that it's just not to be alone
'Cause every single touch don't mean a thing
And every time you're calling out my name
We know that it's just not to be alone
We're loving like we're animals
Like we're animals

Under my skin
(it's killin' us but feels right)
Ready to sin
(baby take a bite)
Like we're animals
Yeah we're loving like we're animals

We're not here to break no hearts
Just let it go

'Cause every single touch don't mean a thing
And every time you're calling out my name
We know that it's just not to be alone
'Cause every single touch don't mean a thing
And every time you're calling out my name
We know that it's just not to be alone
We're loving like we're animals
Like we're animals

Save your sorrows, save them for tomorrow
'Cause in the wild we know

'Cause every single touch don't mean a thing
And every time you're calling out my name
We know that it's just not to be alone
'Cause every single touch don't mean a thing
And every time you're calling out my name
We know that it's just not to be alone
We're loving like we're animals
Like we're animals
We're animals
Like we're animals
