

# Time Machine

Alicia Keys

Fear of what's in the mirror, yeah  
So much to be afraid of  
Scared of what we're made of  
And what we might be

Young life flies out the window, yeah  
It's not the time that changed us  
It's the dreams that we weren't chasing  
Come back to haunt us, eventually

That's why every morning, after dawn and  
Tell your darling something is calling  
Drive me crazy, I just can't explain it

Go out of your mind (Out of your mind, out of your mind, out of  
your mind)  
Go out of your mind (Out of your mind, out of your mind)

No, we can't rewind, life ain't no time machine  
But once you free your mind, there's beauty in everything

That's why every morning, after dawn and  
Tell your darling something is calling  
Drive me crazy, I just can't explain it

Go out of your mind (Out of your mind, out of your mind, out of  
your mind)  
Go out of your mind (Out of your mind, out of your mind)

No, we can't rewind, life ain't no time machine  
But once you free your mind, there's beauty in everything
