

## Bloodied Up

Alkaline Trio

You don't say much of anything  
When questioned of your whereabouts, your whereabouts  
And I just can't see through the evidence  
It's evident  
It's right in front of me in black and white and red

And I don't believe in much of anything  
I'm glad I have people I call friends  
If it was up to me I'd never have to miss you  
It's for the better in the bitter end  
I guess you'd know the best

You have every right to be  
This appalled with me  
Join the club  
I signed up a long time ago and I know how you feel  
And when you decked me  
You left me knocked out on the floor  
I came to bloodied up, but you weren't around  
I picked my teeth off the ground like they'd been there before

You don't say much of anything  
When questioned of your whereabouts, your whereabouts  
And I just can't see through the evidence  
It's evident  
It's right fucking their in black and white and red

You have every right to be  
This appalled with me  
Join the club  
I signed up a long time ago and I know how you feel  
And when you decked me  
You left me knocked out on the floor  
I came to bloodied up, but you weren't around  
I picked my teeth off the ground like they'd been there before.
