

Until Death Do Us Part

Alkaline Trio

Goodbye for now, leaving town for a while
Broken heart, broken bones, fading smile
Did I lose everything that I love?
I suppose that I did when push came to shove

Now I want you back and waiting there for me
I won't hold my breath, I don't expect a thing
But a boy can dream

Tell me everything will be okay
Tell me that you're still in love with me
Tell me how to get back into your heart
And there I shall remain till death do us part

Goodbye for now, leaving town for a while
Broken heart, broken bones, fading smile

Now I want you back and waiting there for me
I won't hold my breath, I don't expect a thing
But a boy can dream

Tell me everything will be okay
Tell me that you're still in love with me
Tell me how to get back into your heart
And there I shall remain till death do us part

Tell me everything will be okay
Tell me that you're still in love with me
Please tell me how to get back into your heart
There I shall remain till death do us part
