

Dead and Cold

Allele

So good it had to be
A life that was a fantasy
All the covers on the floor
The way we talk til dawn
It's a pain I just can't scrape
'Cause I still see the light on
When I am all alone

'Cause now you're dead and cold
There's a world outside you
I will never know
Even time won't change it
Now you're dead and cold
Now you're dead and cold

The same road but can't find the way
That leads to where we were
A fingerprint still on the glass
And the message on the phone
How do I face in the way to compromise?
But I stil see the light on
When I am all alone

'Cause now you're dead and cold
There's a world outside you
I will never know
You'll never be a memory
Could I face it alone?
It's hard to breathe when I can't let you go
Even time won't heal the past

I'm turned around just like the ocean in a hurricane
Still feel you breathe as you stand behind me
'Cause I still see the light on
So close a river flows and it changes the way
[?] find the face and tell me it wasn't all a waste?
I'm lost without you
I'm lost without you

'Cause now you're dead and cold
There's a world outside you
I will never know
Even time won't change it
Now you're dead and cold
Now you're dead and cold
Even time won't change it
Now you're dead and cold
