

Glory Days

Aloe Blacc

I remember the days when we had none
Tryna fight through the waves, we were so young
Made the best of the place that we came from
But I never woulda made it
No, I never woulda made it alone
We would blaze through the night to the sad songs
And we'd dream of a life full of stardom
It would take us away from the problems
No, I never woulda made it alone

Welcome to the glory days
We finally made it out the maze
The memories never fade away
My glory days are with you
My glory days are with you
Welcome to the glory days
We finally made it out the maze
The memories never fade away
My glory days are with you
My glory days are with you

Stressin' over dumb shit that would keep me up at night
You were always there just like an angel by my side
Tell me not to worry, we could leave it all behind
One day, we'll be living up the good life
Look at how far that we've come, do anything that we want
Take a vacay from our moms, we could just chill in the sun
Now that the struggle is done, we get the seat at the front
I'm glad I didn't do it alone

Welcome to the glory days
We finally made it out the maze
The memories never fade away
My glory days are with you
My glory days are with you
Welcome to the glory days
We finally made it out the maze
The memories never fade away
My glory days are with you
My glory days are with you

And all I wanna say is
Even if we ended up with nothing
I know that we were fightin' for something
The only thing that matters is one thing
It's that I did it with you

Welcome to the glory days
We finally made it out the maze
The memories never fade away
My glory days are with you
My glory days are with you
Welcome to the glory days
We finally made it out the maze
The memories never fade away
My glory days are with you
My glory days are with you

My glory days are with you
My glory days are with you
