```
Emi
Baby Baby - what do I do? Playing my tune for you, playing my tune
for you, just to get you in the mood
Everybody's going to Hollywood, you're driving me mad, but I'm smiling
            Emi
to the crowd instead
 С
A lot of money is at stake, this is hit and that's a fake
This is what you mean to me, this is what they all should see, make a
make-up in a foolish style
Telling the truth by making a big? Lie when I come, I come but
nothing's at ease
                                          Emi
Breaking up the whole is a modern disease, maybe you think tomorrow's
just a joke
It's a joke after joke after joke
                                                          Emi
R: My love, everything's an interview and nothing's really new and
   everybody's looking for clues
  And you know what to do with a clue my love
   I get ready for the show, they're waiting and they will never go
                                                    G D Emi C
   This night is just to go-o-o-o, and it's only for show
Dig that deal and be a millionaire, drinking cocktails in the
stratosphere
Getting jetlagged with my business-friends in these supersonic wonderlands
There's a shadow on the graphic display, first he's smiling then he's
        Emi
fading away
                                               C7
Maybe he thinks tomorrow's just a joke, it's a joke after joke after joke
after joke
R: My love, everything's...
```
