

Lonely At Night

Amanda Shires

I'm standing in the sunlight
After last night's rain
I still picture you singing
No matter how hard you just raged
But you just had to say it
That you don't know anymore
And I staggered in the silence
But I wanted to roar
And we are star-crossed at best
And I know you get so lonely at night
I can't make it better (I can't make it better)
But I want us to be alright
Alright
I'm not joking when I say this
There's no one I want more
How 'bout you save it and replay it
I've only ever been yours
Can you just stop with theses little wars?

Can you just hold on and hope a little longer?
I can't make it better (I can't make it better)
But don't threaten me with an open door
Alright
Can you just stop with these little wars?
Could you just hold on and hope a little longer?
I can't make it better (I can't make it better)
But don't threaten me with an open door
We are star-crossed at best
And I know you get so lonely at night
I can't make it better (I can't make it better)
But I want us to be alright
Alright
I don't want a fight
