

Lookout for Hope

American Hi-Fi

The snow is a backdrop
It's the scene where the past gets dropped
You're hands are sweating
Even though you're shivering

It's best to have thick skin
Or else you'll let the wind get in
There's plenty to be sick about
But you, I can't do without

We can find what we're looking for
I know you're starting to doubt it
Turn you a bit around
Hear the world make a brand new sound

I'm a cold, cold cynic
Today I do the optimist twist
Maybe it's the weather
It can only get better

Up and down, down and up
Honey, you and I are really messed up
But I'm still dreaming
That you're not leaving

We can find what we're looking for
I know you're starting to doubt it
Turn you a bit around
Hear the world make a brand new sound

Can we let go off these days?
But don't let go off me, baby
Hearts get poured into
When there's nothing left to lose

Lookout for hope
'Cause she's coming into view

We can find what we're looking for
I know you're starting to doubt it

Can we let go off these days?
But don't let go off me, baby
Hearts get poured into
When there's nothing left to lose

Lookout for hope
'Cause she's coming into view
Lookout for hope
'Cause she's coming into view

It could only get better
It could only get better
It could only get better
