

## How Many Six Packs Does It Take

American Music Club

I never had a lot to bring to the party  
But a self-importance far beyond vanity  
And a manic depression that just wouldn't go away  
Like Peckinpaw with a bouquet of poison ivy

How many six packs does it take to screw in a light  
It's good to be alive baby, sometimes it's alright

Nothing like a little vacation once in awhile  
At the Cable Car Hotel San Francisco style  
For three nights and three days  
Jesus hung on a boom box while it played  
Every single song ever sung by Billie Holiday

How many six packs does it take to screw in a light  
It's good to be alive baby, sometimes it's alright

Afterwards I'm on California Street looking at the sky  
The sun is going down pouring salt into my eyes  
Like he said: When the light goes out so does fear  
And you only see beauty as it begins to disappear

How many six packs does it take to screw in a light  
It's good to be alive baby, sometimes it's alright
