

What You Wanted

Andrew Allen

Is this what you wanted
Is this what you needed me to be
I heard that he's perfect
But he isn't me
You left in December
Without saying goodbye
I still remember the letter it said that you gave it your best try

It should've been you and me
I could've been all you need
We could have got older and older
Why can't you see
We should've had all our dreams
You could've had everything that you wanted
Is this really what you wanted

Now in September
The radio is playing our song
And I still remember the words sounded better when you used to sing along
Maybe it's worth it
And maybe you'll be just fine (fine, fine)
I hope that he makes you laugh
That he takes you out all of the time

It should've been you and me
I could've been all you need
We could have got older and older
Why can't you see
We should've had all our dreams
You could've had everything that you wanted
Is this really what you wanted

I won't fade, I won't fall apart
'Cause I can't stand living with a broken heart

It should've been you and me
I could've been all you need
We could have got older and older
Why can't you see
We should've had all our dreams
You could've had everything that you wanted
Is this really what you wanted

It should've been you and me
I could've been all you need
We could have got older and older
Why can't you see
We should've had all our dreams
You could've had everything that you wanted
Yeah, everything that you wanted
Is this really what you wanted
