

# Ghost

Andy Mineo

What you even come around for?  
You ain't have my back even when I had yours  
We said we'll take the whole world over  
You couldn't even tell me what's wrong  
Still think about it though it's been so long  
Thought we'd be down forever, now you're gone

I remember, I remember  
It wasn't many days that we didn't chill together  
We was hangin' in my dorm room, we would write them rhymes  
Then record 'em in my closet cause we was next to shine  
Even had our own handshake, fall into that hug  
And we was different colors, but we swore that we were blood  
And, uh, all of a sudden you deaded everyone  
I had to find out through the internet you had a son  
And when I text you won't hit me  
This music took me all around the world, you were s'posed to go with me  
But, uh, the thug changes and love changes  
And them best friends become strangers  
I knew what Nas said was true  
I just never thought it be about you  
But, um, people come, people go  
And when they leave it's like they took a piece of your soul  
It's sorta like a ghost

I didn't know you could walk through walls  
I didn't know you could float  
I didn't know you could disappear  
I guess you were a ghost  
Ghost  
Ghost  
We used to be so close

I pray I don't get used to this feelin'

The closer you are, deeper the cuts, longer the healin'  
These feelings and insecurity, they circle  
I just walk around like ain't a soul on this earth that's hurtin' me  
I do this for protection  
When I feel rejected I just dead 'em first, man  
Somebody bring the hearse in  
My worst fear in life is that my wife would have the urge to leave  
Like everybody else start desertin' me  
I know we made vows, but I cannot believe when I see divorce rates  
You know why I got doubts  
Fear takin' control  
Seein' it, now I know  
To truly love a person, the bravest act of the soul  
I could either get my heart again, put it in the open  
Or lock it in a box where it never be broken  
But there it grows cold, lifeless and old  
Nobody could come close but it's safe  
Protected from the ghost

I didn't know you could walk through walls  
I didn't know you could float  
I didn't know you could disappear

I guess you were a ghost  
Ghost  
Ghost  
We used to be so close

What you even come around for?  
What you even come around for?  
What you even come around for? (let it go, let it go, let it go)  
What you even come around for?  
You ain't have my back even when I had yours
