

# Quits

Andy Williams

What will we call it now  
It isn't marriage anymore  
Call it new, call it different  
It's not the way it was before  
Out of all the words to choose from  
There's only one that fits  
Call it what you want to  
I just call it quits

We've come down to the place  
Where love never fits  
Call it what you want to  
I just call it quits

Turn and walk away  
Across the desert of our hearts  
Love turns to sand  
And we've run out of time  
You know we once had something  
No words could tear apart  
Now you be yours and I'll be mine

We've come down to the place  
Where love never fits  
Call it what you want to  
I just call it quits

Call our friends and tell them  
That we just don't care  
Tell them dreams are flowers  
And our garden's bare  
Call it separation independence  
Divorce if that word fits  
Call it what you want to  
I just call it quits

We've come down to the place  
Where love never fits  
Call it what you want to  
I just call it quits  
Call it what you want to  
Honey, I just call it quits
