

Parasite

Anette Olzon

Follow the tempter, a Tune for the new age
For the mindless and the numb
A Monster that's who you are
Twist the mind of them all
(Who can Save him?)
No warnings No Signs - A demon arrived
Smooth disguised
Fill ears with Lies - Came in from behind
Stealing lives

How could we not foresee it?
The signs were there to see it!

Open your eyes - time to take fight
Push the evil out of sight
Take off the blinds and
Leave him without - close down all rights
Terminate the parasite!

His ways - stole days
Took our rights
Dehumanized - constant lies
Twisting minds
(Who could stop him?)
Again and again
Used women and men
Made them fall
Left trace and disgrace
Human erased
Mocked us all

How could we not foresee it?
The signs were there to see it!

Open your eyes - time to take fight
Push the evil out of sight
Take off the blinds and
Leave him without - close down all rights
Terminate the parasite!

Leave him without - close down all rights
We must end the hate
Push the evil out of sight
Take the blinds away
Leave him without - close down all rights
We must end the hate
Push the evil out of sight
Take the blinds away

How could we not foresee it?
The signs were there to see it!

Open your eyes - time to take fight
Push the evil out of sight
Take off the blinds and
Leave him without - close down all rights
Terminate the parasite!

Open your eyes - time to take fight
Push the evil out of sight
Take off the blinds and
Leave him without - close down all rights
Terminate the parasite!
