

Watching Me From Afar

Anette Olzon

Like every wind that blows
And stars that glow
Deep in the darkest night
You're my light

From all the flowing trees
To little bees
Beneath what's wrong or right
You're the air I breathe

Just like a melody
Floating over time and space
I see your face
No matter where you are
No matter how near or far
You're in my heart
Like a star
Watching me from afar

Deep in the darkest time
Your shine on mine
Show me the way to climb
Do what's right

For every single word
You're in my world
The doubts just disappear
You're the one I hear

Just like a melody
Floating over time and space
I see your face
No matter where you are
No matter how near or far
You're in my heart
Like a star
Watching me from a far

Just like a melody
Floating over time and space
I see your face
No matter where you are
No matter how near or far
You're in my heart

Just like a melody
Floating over time and space
I see your face
Like a star
Watching me from a far

Like a star
Watching me from a far
