## **Watching Me From Afar**

## **Anette Olzon**

Like every wind that blows And stars that glow Deep in the darkest night You're my light

From all the flowing trees
To little bees
Beneath what's wrong or right
You're the air I breathe

Just like a melody
Floating over time and space
I see your face
No matter where you are
No matter how near or far
You're in my heart
Like a star
Watching me from afar

Deep in the darkest time Your shine on mine Show me the way to climb Do what's right

For every single word You're in my world The doubts just disappear You're the one I hear

Just like a melody
Floating over time and space
I see your face
No matter where you are
No matter how near or far
You're in my heart
Like a star
Watching me from a far

Just like a melody
Floating over time and space
I see your face
No matter where you are
No matter how near or far
You're in my heart

Just like a melody
Floating over time and space
I see your face
Like a star
Watching me from a far

Like a star Watching me from a far
