

## Night Comes Early

Angel City

Try to find an empty seat up at the front  
To take a chance on a loaded dice  
And if you do they will remember you cause  
They know once is nothing when you need it twice

Take care of desire, beware of the bad nights  
Make sure that you feel alright because

Night comes early, when you're lonely  
In the night, do you wait for the time to pass?  
In the night, do you make love to your looking glass?

When you said you wanted aces and eights  
You added fire to the joker's curse  
You volunteered to return for more  
Well he's got you now for better or for worse

Doing time on your own, can't see where you're goin'  
Your precious fantasy still leaves you lonely, still leaves you  
lonely

In the night, do you wait for the time to pass?  
In the night, do you make love to your looking glass?  
Night comes early, when you're lonely  
Night comes early, when you are alone

(Break)

In the night, do you wait for the time to pass?  
In the night, do you make love to your looking glass?  
In the night, do you wait for the time to pass?  
In the night, do you make love to your looking glass?  
Night comes early, when you're lonely  
Night comes early, when you are alone

In the night  
In the night  
In the night  
In the night
