

# Nothing Else

Angus & Julia Stone

You don't wanna be rich like everybody else does  
You just wanna grow old, sit still while everybody else runs  
In the meantime, tell me your star sign  
I'll make something up about how you have to fall apart to really be someone

[Chorus]

There's nothing else to do here but kiss under the stars  
I like you just the way you are  
There's nothing else to do here but fall into your arms  
I like you just the way you are

You're not like the others ones  
You just wanna go slow, sit still and come undone  
In the meantime, you wanna have some fun  
Oh, you say you have to fall apart to really be someone

[Chorus]

There's nothing else to do here but kiss under the stars  
I like you just the way you are  
There's nothing else to do here but fall into your arms  
I like you just the way you are

Just the way you are  
Just the way you are  
Just the way you are  
Just the way you are... I like you  
Just the way you are  
Just the way you are

[Chorus]

There's nothing else to do here let's jump into your car  
I like you just the way you are  
There's nothing else to do here but fall into your arms  
I like you just the way you are

Just the way you are... I like you
