

How could you do it

Anna Abreu

I hear what you saying
Your lips move like they're praying
I see it through my tears
Oh, You say you can't let me go

You've taken my heart
And you've burned it to the core
You've played your part
now it's my time to steal the show

How could you do it
How come you blew it
You broke a precious thing
And think that you can glue it
How could you do it
You took me through it
You're messing with your destiny
But you can't fool it
How could you do it
Yes I can prove it
My privacy is not for you
Because I rule it
How could you do it for me
How could you do it for me

Feelin' cold and lonely
You were my one and only
The sun is falling from the sky
And you're the reason why

'Cause you took my heart
And you tossed it on the floor
Can't live in a lie
No, I can't take this no more

There's no point in crying
If your heart feels like dying
You chose to have it your own way
Now you just have to let me say:

How could you do it for me
How could you do it for me
