

When We Both Had the Time to Love

Anne Murray

If you should wonder, darling
I'm going away
If there's any more questions
That's all I can say

But there was a time
We walked this world together
Not knowing a thing
Before we looked
To find the words in the music
We learned how to sing

That's when we both had the time to love
Yes, we both had the time
When we both had the time to love
Yes, we both had the time

The hours of laughter drifted
So far away
Into a strange world
We had no time to play

And everywhere we go it followed
Calling my name
And in the place of love and laughter
Stood fortune and fame

That's when we both had the time to love
Yes, we both had the time
Time
When we both had the time to love
Yes, we both had the time
To love

And without rhyme nor reason
We changed the season
We made the plastic sun
And the world was never worst
Not after that was done

That's when we both had the time to love
Yes, we both had the time
Time to love
To love
When we both had the time to love
Yes, we both had the time
Time to love
To love

That's when we both had the time to love
Yes, we both had the time
Yes, we both had the time to love
