

Where Do You Go When You Dream

Anne Murray

You've been moody and distracted
But I've never seen you like you are today
My love, you're so very far away
And I can't get inside you
I cannot get to where the secret lies
Past those shadows in your eyes.

Where do you go when you dream
And is there someone with you
And what do you do
You don't do with me
Where do you go when you dream
Is the morning as beautiful there
As when you share a dream with me
How could it ever be?

But tell me how to bring you back
Should I be distant too
Oh no, I couldn't be that way with you
You know you can be honest
If there's something wrong then tell me so
But darlin' I just need to know.

Where do you go when you dream
And is there someone with you
And what do you do
You don't do with me
Where do you go when you dream
Is the morning as beautiful there
As when you share a dream with me.

Where do you go when you dream
And is there someone with you
And what do you do
You don't do with me
Where do you go when you dream
Is the morning as beautiful there
As when you share a dream with me...
