

You Make Me Curious

Anne Murray

I wanna be charmed
I wanna be loved
In an old fashioned way
Life holds the key
To the passion in me
But it's too soon to say
The only thing I know for sure
Is all that meets the eye

You make me curious
You know what curious can do
You make me curious
I wanna get close to you
Yes I do

Every romance
There's always a chance
Of moving too fast
Say you'll agree
It's all up to me
Cause you want this to last
Your saying all the right things darlin'
Where do we go from here
Hmn

You make me curious
You know what curious can do
You make me curious
I'm fallin' in love with you
You make me curious
Give me all you've got to give
You make me curious
Show me where heaven is

Now that we've kissed
I know what I've missed
And I'm filled with desire
Every touch
I feel such a rush
Whoa you set me on fire
Now that you've shown me paradise
Nothing else will do
Hmn

Nothing else will do

You make me curious
How do you do the things you do
You make curious
I'm fallin' in love with you
You make me curious
With every kiss with every touch
You make me curious
I'm fallin' in love in love in love

You make me curious
Give me all you've got to give

You make me curious
Show me where heaven is
