

I'm drifting off into nothingness,  
So terrified of what will be  
Tomorrow is the day, I can't back out  
But I'm scared of what will happen to me  
They say a simple procedure  
It's supposed to be all so routine  
But what if the doctor was evil and very, very mean

Just call me doctor, just call me pain  
I'll show you horror that you've never gonna see again  
Pass me the scalpel, pass me the knife  
You don't need no medicine cause I'm gonna take your life

Please wake me out of this nightmare,  
I've got to get out of this dream  
A victim of the Dr. Psycho,  
Like nothing that you've ever seen

As I begin to cut you, screaming out in fear  
There's no one to help you, no one's gonna hear  
This ancient operation, extracting part of the brain  
There's no way to turn it back  
You're never gonna be the same

Thought I'd be in a cosmetic bliss  
Now I smell the stench of my own piss  
All I wanted was to look real good  
Just one more chance, I'll leave it like I should

I am the doctor and I'll kill your pain  
This is my specialty, extracting part of the brain
