No Way Out

Annihilator

Turned on the television What did I see? A selfish evil psychopath Blackened eyes looking at me

On trial fight for your life One big waste of time A shot to the head sliced throat A stab in the back the crime

Testified, crucified There is no way out Suicide, suicide There is no way out for you

Lies lies manipulation Too many stories to keep But this time it's bit you in the ass You're in too deep

Arrogant, self-loving bitch The center of the world Into the pits of hell girl

Testified, crucified There is no way out Suicide, suicide There is no way out for you

Blacken the name of your victim And drag his name through the mud No regret for your actions (no regret) And no remorse for the blood (blood)

So tragic we wonder why You sentenced a man to die (die)

Pre-meditation You tried to cover your tracks Without hesitation Clean up the scene of attack

Convenient memory loss Acting like this is fun Can't seem to remember What the hell have you done

Testified, crucified There is no way out Suicide, suicide There is no way out for you There is no way out for you (For you)
