

Suicide Society

Annihilator

Welcome to the dark side, the human race
Crumbling before us, ending in disgrace
Politicians, corporations, a slap on the wrist
Spewing toxic chemicals, now mother earth is pissed

What have we done, it's only just begun
This suicide society is getting out of hand
We'll never learn until we burn
A suicide society, we're all just mad

Give me everything I want, never satisfied
Extreme religion, hellbent on genocide
Pesticide, open wide, poisoning the well
Radiation, medication, we're all just going to hell

No respect for what we're given
Humanity just wasting away

Take the blame, fell the shame
Play your games, down in flames

We're running out of time but we can't wait any longer
