

## Bomb Threat

### Anti-System

All things bright and beautiful, all creatures great and small  
Now have all been wiped out, the good bomb took them all

Dismantle all your weapons, they only bring you harm  
I hope I never see destruction or hear the warning alarm

A bomb threat forever hangs over our heads  
I hope I never see the end, I pray the bomb they never send

If the sirens start to ring, for the fallout shelter I will head  
I know some will never make it -- needless deaths

One - two - three - four

Dismantle all your weapons, they only bring you harm  
I hope I never see destruction or hear the warning alarm
