

## Walk on Water

Anuheia

I'm all about being the best you can be  
I'm all about running it hard  
I'm all about the risk and reward  
Though the vision's sometimes obscured

What do you do when it seems  
Nothing in your life is going your way?

You're trying to walk on water  
You're trying to split those seas  
You're only making it harder to see you always  
Float right back to me

We purposefully mask the clarity  
We're throwing mud in that wishing well  
But in a beach of sand and stone  
You're a sunrise shell

What do you do when it seems  
No one in your life is on the same page

You're trying to walk on water  
You're trying to split those seas  
You're only making it harder to see you always  
Float right back to me  
Float right back to me

Hey Mr. Mellow where is he when you needed him most  
Come and give me some clarity cause  
You got holes in your shoes and you're watching the news  
And they're saying that you're pretty much screwed so  
Take me off of this train you got too much on your brain  
And you need to say a prayer today  
For the first time in a long time  
You're looking for the strength in someone else

You're trying to walk on water  
You're trying to split those seas  
You're only making it harder to see you always  
Float right back to me  
Float right back to me
