

# Goodbye

Apparat

(please put me to bed  
and turn down the light)

fold down your hands  
give me a sigh  
put down your lies

lay down next to me  
don't listen when I scream  
bury your doubts and fall asleep

find out I was just a bad dream

let the bed sheet soak up my tears  
and watch the only way out disappear  
don't tell me why  
kiss me goodbye

for neither ever nor never  
goodbye  
neither ever nor never  
goodbye
