

January Baby

Ari Hest

January baby, January baby
Aren't you cold out there
Technicolor lady, technicolor baby
Wondering eyes will stare
Where are you goin'

I know it's easy to get
Caught up in a New Year's oh so lonely
But don't you think you'll regret
Tonight though you're bright on the town
Coming down off the high

January baby, someone's little baby
Mama may not approve
Struggling snowy sidewalks
Icy city cab walks
Stumbling stiletto moves

Will you be somebody's prize
Shivering under your frigid skin
Is your heart that could use a companion
When the damage is done
And the night gives a way to the morning light
You're all alone

January
January baby, January baby
Aren't you cold out there
Where are you goin'
January baby, someone's little baby
Aren't you cold out there
Where are you goin'
January baby, someone's little baby
Aren't you cold out there
Where are you goin'
January baby, someone's little baby
