

Natural

Ari Hest

Look at you falling deep
Into a life you tried to cheat
My love, my love

Look at you tucked away
Your big plans decaying
My love, my love

Don't know what's coming
Don't have any formula
Just trying to do what comes natural

Look at you letting go
Of the only world you've known
My love, my love

Don't know what's coming
Don't have any formula
Just trying to do what comes natural

Because there's no time for cold feet
From here to eternity
Just trying to do what comes natural

Don't know what's coming
Don't have any formula
Natural
Don't know what's coming
Don't have any formula
Don't know what's coming
Don't have any formula
Don't know what's coming
Don't have any formula
Don't know what's coming
Don't have any formula
Don't know what's coming
Don't have any formula
Don't know what's coming
Don't have any formula
Don't know what's coming
Don't have any formula

I need you to see
That now it's you and me
My love, my love
