

The Fire Plays

Ari Hest

He pulled away into the long night
Hard to complain , he got what he came for
Stopped at a light, revved up the engine
Idle inside, he drove his way out of town

I play with fire, I play with fire
I play with fire and the fire plays with me
yeah the fire plays with me

Dark empty road leading to nowhere
She's running away , cause there's no other way
And she tears through the wind
Like a star across the night sky
It's all in your head
She keeps saying to herself

I play with fire, I play with fire
I play with fire and the fire plays with me
I play with fire and higher it rises
I play with fire and the fire plays with me

The drawbridge is down , but soon separating
Step on the gas it happens so fast

I play with fire, I play with fire
I play with fire and the fire plays with me
I play with fire and higher it rises
I play with fire and the fire plays with me ...
