

Chase the Sun

Arrows to Athens

The stars slowly separate
Driving down a road that's taking us away
All I ever wanted was this

Your eyes tell me what you've lost
You finally take a breath now that we are gone
All you ever wanted was this
All I ever wanted

Tonight we chase the sun
We're burning up the sky like the world is ours
But can you feel so lonely if you're not alone?
We'll find away to get back all the light
So we chase the sun

The grass between the air and dust
Is all that holds us back from getting what we want
All we ever wanted was this

Tonight we chase the sun
We're burning up the sky like the world is ours
How can you feel so lonely if you're not alone
We'll find away to get back all the light
So we chase the sun

How much longer must the morning wait?
It's coming up on the horizon

Tonight
Tonight

Tonight we chase the sun
We're burning up the sky like the world is ours
But can you feel so lonely if you're not alone?
We'll find away to get back all the light
So we chase the sun

Tonight we chase the sun
We're burning up the sky like the world is ours
