

Six Feet Down

Ashes Remain

This is not over yet
We won't survive
But this world will not forget
That we were alive
We search for one last breath
As we break down
We fight till nothing's left
Among the ground

There's no way to escape what's coming now
This heart can't be forever
When it's done and the sun falls through the clouds
We will not fade
Six feet down

Bones break beneath the skin
Blood on the ground
Our lungs are caving in
Bullets all around

There's no way to escape what's coming now
This heart can't be forever
When it's done and the sun falls through the clouds
We will not fade
Six feet down

Do you believe in something higher
Won't you bleed for something good

There's no way to escape what's coming now
This heart can't be forever
When it's done and the sun falls through the clouds
We will not fade
Six feet down
