Only Trust Your Heart

Astrud Gilberto

Never trust the stars
When you're about to fall in love
Look for hidden signs before you start to sigh

Never trust the moon When you're about to taste his kiss He knows all the lines and he knows how to lie

Just wait for a night When the skies are all bare and then If you still care

Never trust your dreams
When you're about to fall in love
For you're dreams may quickly fall apart

So if you're smart Really smart Only trust your heart
