

# Silent Treatment

## Atlanta Rhythm Section

I was drinkin' in a loud Hot'Lanta honky tonk  
When I saw her standin' in the crowd alone  
I can't forget the night I met that quiet woman  
Somethin' about her sure did turn me on  
But she gave me the silent treatment all night long

I started once or twice to strike up a conversation  
I gave it my best shot but I struck out  
She never said a word 'til I started leavin'  
And then she said  
"Stick around boy and you'll find out  
What this silent treatment is all about"

You see some things are better left unspoken  
Some things are best said silently  
And it was so beautiful what she said to me

Just goes to show that you can't go on first impressions  
Quietly she showed me I was wrong  
I really learned a lot, it was a revelation  
The night that quiet woman took me home  
And gave me that silent treatment all night long  
...
